QUARTERLY HIGHLIGHTS

- During a period of extreme market turbulence and downside volatility, our Dividend Income Equity portfolio (MDI) navigated the market as it was designed to do and ended the quarter with a modest decline, down 1.74% (gross of fees). The portfolio defended well during the market's selloff but trailed the Russell 1000 Value Index during the March rally and for the quarter, down 0.74%.
- Seven portfolio holdings raised their dividends by an average of 5.2% in the quarter.
- The portfolio's largest sector weightings in Heath Care, Financials, Technology , and Consumer Staples, provide a nice balance of economic sensitivity and stable earnings growth. The portfolio sells at a significant discount to the overall market's P/E multiple with a higher dividend yield and good earnings and dividend growth prospects in the coming year. We believe MDI should be well-positioned to navigate the volatile market we expect during a period of economic growth and rising interest in 2022.

All data is through (or as of) 3/31/2022 unless otherwise noted. Source: Matrix Asset Advisors, Bloomberg, eVestment Alliance.
 *The average annual dividend growth is calculated thru 12/31/2021. **Since Inception: 1/1/2011. Beta, Downside Capture, Standard Deviation and Sharpe Ratio are calculated monthly and are for the 1/1/2011 - 3/31/2022 period unless otherwise noted. Additional disclosure pertaining to the information above is displayed in bold on the last page of this document and is considered to be an integral part of this report.

KEY DIFFERENTIATORS

- Designed to be an all-weather portfolio that can be an effective strategy in all kinds of market environments.
- Strong balance sheets, low betas and under-valuation all contribute to strong downside protection, lower volatility, and potential for capital appreciation.
- Focused best-ideas portfolio, composed of 20-30 high-quality stocks that pay strong dividend yields with a long history of continually growing those dividends.
- Low correlation with other investment styles.
- Experienced team with a long successful history of working together.

The Dividend Income Composite contains fully discretionary dividend income equity accounts that invest in high-quality U.S. large cap value companies that pay high dividends consistently and have raised their dividends historically. For comparison purposes the composite is measured against the S&P 500 Index, an index that measures the performance of 500 publicly traded companies, which are among the largest in the United States. As of January, 2018, it is also measured against the Russell 1000 Value Index, an index which measures the performance of the companies in the Russell 1000 Index with lower price-to-book ratios and lower forecasted growth values. The Russell 1000 Value Index was added as a benchmark as it reflects the investment style of the strategy. The minimum account size for this composite is \$100 thousand. Matrix Asset Advisors, Inc. claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Matrix Asset Advisors, Inc. has been independently verified for the periods 1/1/92 through 12/31/20. Verification assesses whether (1) the firm has complied with all the composite construction requirements of the GIPS standards on a firm-wide basis and (2) the firm's policies and procedures are designed to calculate and present performance in compliance with the GIPS standards. The Dividend Income Composite has been examined for the periods January 1, 2011 through December 31, 2020. The verification and performance examination reports are available upon request. Matrix Asset Advisors, Inc. is a registered investment adviser that manages equity and fixed income assets for client accounts. The firm's list of composite descriptions is available upon request. Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Since inception, the composite policy requires the temporary removal of any portfolio incurring a client initiated significant cash inflow or outflow of 15% or greater of portfolio assets. Past performance is not indicative of future results. The 3 year annualized standard deviation is calculated using monthly data. The U.S. Dollar is the currency used to express performance. Returns are presented gross and net of management fees and include the reinvestment of all income. Net of fee performance was calculated using the highest management fee of 0.65%, as per our fee schedule and applied quarterly. The annual composite dispersion presented is an asset-weighted standard deviation calculated for the accounts in the composite the entire year. Additional information regarding the policies for valuing portfolios, calculating performance, and preparing compliant presentations are available upon request. The management fee schedule is as follows: 0.65% on the first \$5,000,000 of assets under management, 0.55% on the next \$5,000,000 of assets under management, 0.50% on the next \$15,000,000 of assets under management, 0.45% on the next \$25,000,000 of assets under management, 0.35% on the next \$50,000,000 of assets under management and 0.30% on assets under management in excess of \$100,000,000. Actual investment advisory fees incurred by clients may vary. As of 6/09/16, the S&P High Yield Dividend Aristocrats Index is no longer presented, since it is no longer considered representative of the strategy. The benchmark change was applied retroactively. January 1, 2011 is the composite's creation date.

Note: Returns less than a one-year period are not annualized. ¹Period: 12/31/2010 - 3/31/2022. ²The Russell 1000 Value Index was the benchmark used for calculation purposes. ³Scales are inverted for Standard Deviation, Beta and Downside Capture. All portfolio information (Top 10 Holdings, Portfolio Characteristics, Sector Allocation, Portfolio Statistics and Matrix's Defensive Construction) is supplemental to the GIPS disclosure presentation. Portfolio Characteristics and Sector Allocation uses the SPDR S&P 500 ETF as a representative of the S&P 500 Index. Performance and statistics rankings are based on the eVestment Alliance's U.S. Large Cap Value Equity Universe (269 products as of 4/18/2022 since the inception period). Holdings information and portfolio turnover is based on a representative portfolio. The securities identified and described do not represent all of the securities purchased, sold or recommended for client accounts. The reader should not assume that an investment in the securities identified was or will be profitable.
